**Overview**

The COVID-19 pandemic that has occurred over the last two years has brought changes to all sectors of life. The restrictions on social activities had a significant impact on the economic sector, as a result of which the Indonesian economy experienced negative growth in 2020 and the first quarter of 2021. In line with the national economic slowdown, West Java's economic growth in 2020 also experienced negative growth. However, with various efforts and policies carried out by both the Central Government and Regional Governments, economic growth in the second quarter of 2021 has returned to positive. One of the policy steps taken by the Government in encouraging economic growth is through increasing investment realization.

Investment plays a very important role in promoting economic recovery. West Java still hold its position as the province with the highest realized investment value in Indonesia, both foreign direct investment (FDI) and domestic direct investment (DDI). Investment in this case Gross Fixed Capital Formation (PMTB) can contribute about 25 percent to West Java's economic growth. To encourage increased investment in West Java, the West Java Provincial Government has taken various policy steps to attract investment in West Java through the development of the Rebana Area and the Southern West Java Region as the main investment destinations in West Java.

With the issuance of Presidential Regulation No. 87 of 2021 regarding the Acceleration of Development of the Rebana Area and the Southern Part of West Java, it is hoped that there will be an acceleration of infrastructure development in the two regions to reduce infrastructure disparities and increase investment realization in both regions. In this regard, to attract investors and as a medium for promoting potential and investment opportunities in West Java, the West Java Provincial Government together with the Bank Indonesia West Java Representative Office will hold The 3rd West Java Investment Summit 2021.

West Java Investment Summit is an annual promotional agenda organized by the West Java Provincial Government with the Bank Indonesia West Java Representative Office which aims to promote investment potential and opportunities in West Java.
